

# Peri x Prairie Falcon

MALE

*Falco peregrinus x Falco mexicanus*

May 2005

## “Airth”

*“Cool, calm and collected”.*

HYBRID

### DESCRIPTION & IDENTIFICATION

The Peregrine falcon is the fastest creature on earth, reaching speeds in excess of 200 mph, (320 kph). The Prairie falcon is larger, but slower. These hybrid species provide the best features of each individual species, a fast large falcon with both strength and stamina. Colour established at maturity.

### HABITAT & LOCATION

Although rare, the peregrine falcon is more widespread than any other falcon, found on every continent except Antarctica. Prairie falcons are found in south east Canada and western United States. Prefers rocky cliffs and disused quarries

### NATURAL DIET

Mostly medium sized birds, such as wading birds, pigeons, ducks.
